Subject: DOI Rolling Knolls report correction
Attachments: DOI Rolling Knolls Landfill Draft FS Assessment Report (2019).pdf

Hi Juan and Betsy,

At the recent meeting with NJDEP, Steve Byrnes noted that the report DOI provided had a units error related to NJ's Lowest Effect Level (LEL) and Severe Effects Level (SEL) values on Table 5. The units error was for Total DDx and Total PCBs and has been corrected on both Tables 5 and 6. In addition, the report text discussing these tables on page 22 has also been corrected. Although this error did not alter the report findings in any significant way, we want you to have the version with these corrections, which is attached.

Please pass this updated version of the report on to others at EPA that may have a copy. If anyone at EPA has any comments on the report, please let us know.

Thanks,
Kim
